I am a devoted problem solver, thoughtfully approaching any challenge that comes my way. My career in hospitality taught me that little things can affect someone immensely, and that any chance I have to improve someone's life should not be taken for granted. Technology will allow me to proliferate this ethos to a larger audience.

Technologies:

JavaScript, Node.js, React, Redux, jQuery, Express.js, C, Python, PostgreSQL, Git, Heroku, Bootstrap, Material-UI, Django, HTML5, CSS3

Work History:

Prime Digital Academy - Full Stack Software Engineering Student - 09/2020 to 02/2021

- Full Stack web development using JavaScript and JavaScript based frameworks, such as React.
- Created full stack CRUD web applications, often in groups, while managing pull and merge requests from other group members.
- Became a well rounded developer, learning skills like public speaking, paired programming, group projects, diversity training, best practices in a real work environment.
- **Solo Project:** Match Thread
  - Multi-user web application allowing users to rate and discuss the performance of teams in completed soccer matches.
  - Schedules, players and team information are available throughout the application for Major League Soccer (MLS).
  - Technologies: JavaScript, React, Redux, Express.js, PostgreSQL, Git, Material-UI.
- **Client Project:** Results Foundation Grant Application Portal
  - Multi-user web portal that allows users to apply for grant funding from the Results Foundation.
  - Administrative side allows the administrator to manage grant windows, review and score applications, and export a printable version of the application with scoring to present to the board for final decisions.
  - Administrative side also provides immense flexibility in altering the application, allowing adaptability in an ever changing role for the administrator.
  - Technologies: JavaScript, React, Redux, Express.js, PostgreSQL, Git, Nodemailer, React-Bootstrap.

<u>Marvel Bar - Server & Bartender - 04/2016 to 03/2020</u>

- Go above and beyond guest expectations. Often created or gifted a custom tasting experience for every guest, utilizing my intimate knowledge of over hundreds of spirits.
- During service, prepared intricate cocktails in a high-tempo environment while maintaining a comfortable, inviting atmosphere for all guests.
- Weekly full team meetings to discuss service, technique, marketing, and procedural efficiency

<u>Wilde Roast Cafe - Server & Bartender - 04/2013 to 04/2016</u>

- Given the extended hours of the business, interacted with a diverse crowd, from business lunches, to celebratory dinners.
- Handled high-volume event weekends, such as Stone Arch Bridge Festival, Polish Festival, Aquatennial, and others.
- Acted as an hub for the Twin Cities LGBTQ community, something that was very important to the owners.

<u>Bulldog N.E. - Food Runner - 11/2010 to 11/2012</u>

- Expedited orders for the kitchen, delivered food to guests on the main floor, acting as a link between the front of house and back of house.
- Maintained and organized a large keg room with rotating taps.

Education and Credentials:

- Harvard X CS50x Certificate
- Prime Digital Academy - Full Stack Software Engineering Certification

Volunteer Work:

- All Dogs Minnesota Animal Rescue, Foster Family
- ZOOM House Outreach Program
- Independent Work During the George Floyd Protests
